

ADVISORY SERVICES
CodeWriter

NAVEX Global also offers:

An **Ethics & Code of Conduct training course** to help you train and educate your employees on code basics.

A **policy management solution** to help you keep your code up-to-date and make uniform changes as policies within the code are updated.

Awareness campaign design and implementation services to increase knowledge and usership of the code and other ethics and compliance tools among employees and stakeholders.

Creating a Code of Conduct that Fits

NAVEX Global's Code Writer service provides customers a high-quality, professionally-designed Code of Conduct that incorporates many best practice elements of custom Code of Conduct, but at a substantially lower cost.

Based on our Ethical Leadership Group's deep expertise and vast experience developing Codes of Conduct, Code Writer is intended for clients who may not have a Code, have a "skeleton" Code or just want to rework their Code utilizing the expertise of ELG.

The time and effort required of customers is minimized by utilizing our streamlined development process. Clients may choose from a number of writing styles, layouts, content structures and stock photos.

Consultants from NAVEX Global's Ethical Leadership Group advise and coordinate with customers at each step of the process. For best success, our offering is intended to be a three-year program that includes an initial Code of Conduct delivery, a consultation with an ELG consultant in years two and three and an update during the three-year period. Of course, clients may also choose to purchase only the initial Code of Conduct.

TRUST NAVEX GLOBAL

NAVEX Global is the trusted ethics and compliance expert for more than 8,000 clients in over 200 countries – the largest ethics and compliance community in the world. A merger of industry leaders ELT, EthicsPoint, Global Compliance Services and PolicyTech, NAVEX Global provides a comprehensive suite of solutions to manage governance, risk and compliance, providing critical cross-program insights through unmatched expertise and actionable data.
