

# Compliance Awareness Solutions

One of the biggest challenges facing risk and compliance programs is ensuring executives, employees and other stakeholders are aware of their E&C expectations and responsibilities. Too many do not understand the capabilities of the program nor simply how to access the compliance tools available to them. Compliance Awareness solutions fill that gap and ensure your stakeholders know both about your program and how they play a part in it.

These package solutions are designed to support and promote understanding and access to your hotline and incident management system, key topical areas, procedures, and training. These help your organization highlight and emphasize what matters in your ethics and compliance program.

Our Compliance Awareness packages, with more than 50 awareness assets, align to the various components of an effective compliance program. We have made ordering our awareness assets simple and easy, allowing you to select the package and pricing options that fit your program demands and cultural needs. Match assets to ethics and compliance training topics. We can help you make it happen.

## Offerings

Our packages of pre-designed templates that provide a quick and simple way to introduce or remind your organization about your ethics and compliance program. These assets can be used by your organization to inform and describe your hotline program, your approach to ethics, address key topical behaviors and your code of conduct.
