NAVEX IRM™ Editions Comparison

NAVEX IRM Comparison

NAVEX IRM brings visibility to risks frequently managed in disparate sources. Our platform editions aggregate datapoints from across the organization, as well as from assessments, audits, authoritative sources and external systems. Having everything centralized, correlated and connected enables you to understand and holistically manage risk for a stronger, more resilient business.

NAVEX IRM Standard

NAVEX IRM Standard puts you in control of operational and IT risk. Whether you are complying with multiple regulations, overseeing vendor relationships, investigating vulnerabilities or preparing for an audit, Standard empowers you to more efficiently and effectively manage risk to stay compliant and secure.

NAVEX IRM Enterprise

NAVEX IRM Enterprise is our most extensive and flexible solution and enables an integrated and agile risk management program. Enterprise gives you a comprehensive view of your risk landscape and places it within the context of your business, allowing you to make more risk-based business decisions and drive performance.
