

EthicsPoint[®]: Foundation vs E-Lite

Growing businesses and hotline programs can benefit from upgrading to E-Lite

Our goal is to help your hotline keep up with your growing and changing compliance program needs. EthicsPoint, NAVEX's market-leading hotline and incident management solution, supports your reporting program from intake to assignment to investigation, remediation, reporting and audit.

Benefits of upgrading to EthicsPoint E-Lite include:

Sharing more of the world's leading Hotline and Incident Management platform across your organization

- EthicsPoint E-Lite is built to meet the needs of our larger and growing customers' needs; for customers who are looking to exceed best practice guidelines such as collecting all incident reports across their organizations, E-Lite has the ability to map reports into department-specific tiers with individualized workflows, administrators and permissions.

Navigation tools to help you and your team manage your growing level of reports

- From advanced search (which looks for matching text in all fields of a report) to information contributor workflows that let witnesses and supervisors contribute information securely and directly into EthicsPoint without the need for a login, E-Lite has the tools you need to manage your growing report volume.
- More than 80% of employees will report incidents directly to their manager¹, so it is imperative that your organization has a way to capture and track these valuable face-to-face reports within your incident management system.

Learning more from your data with GRC Insights dashboards

- A powerful, aggregate view of your program's data, these dashboards were built to provide at-a-glance insight into your key compliance program data for leaders, boards and audit committees while empowering administrators and investigators with drill-down capabilities to identify trends and manage key performance indicators in one simple, pre-formatted reporting platform.

¹ Ethics Resource Center (2014). National Business Ethics Survey[®] of the U.S. Workforce. Arlington, VA.

Feature	Foundation Includes	E-Lite Adds
Intake	Secure hotline and standard web intake options.	Customizable web intake and open-door report forms that allow for wider visibility into organizational risk.
Investigations	Single case template for all investigations.	Adaptive case management that empowers you to have distinct investigation templates for different issue types, departments or tiers.
Manage	Simple tools such as automatic case assignment, watchlists and notifications.	In addition to the foundation-level management tools, advanced tools such as full-text search and the ability to link related cases.
Analytics	Standard reports, templated and ad hoc, with sharing capabilities.	GRC Insights dashboards that provide flexible visibility into your compliance program's key performance indicators.

NAVEX is committed to helping you find the best version of our platform to meet your growing risk and compliance needs. As your program, report volume and business grows, we believe our EthicsPoint E-Lite solution will help you and your team address more compliance risks and continue to foster a speak-up culture across your organization.

Reach out to your account executive to learn more about upgrading to EthicsPoint E-Lite.
