

# Manage ESG Disclosures with Ease

Navigating the fragmented and complex ESG disclosure landscape can be challenging. However, consolidation is underway as guidance issuers strive to align their separate yet overlapping goals. Various standards emphasize environmental, social, and governance metrics, while some focus on financial materiality, and others offer strategic guidance. With mounting regulations and mandatory disclosures trending up, accurate reporting in this ever-changing environment is crucial.

NAVEX ESG Disclosures simplifies environmental, social and governance reporting for compliance and sustainability professionals using an automated and auditable workflow that streamlines annual reporting.

## With NAVEX ESG Disclosures, organizations can:

- Simplify reporting with preloaded ESG Standards and Frameworks
- Stay accountable with due dates, completion rates, and workflow stages
- Achieve data assurance through our auditable and centralized platform
- Uncover insights with dynamic visual analytics for KPIs and trend analysis
- Export results to support annual reports and disclosures

## **Align to leading ESG disclosure guidance**

Through a partnership with leading ESG standards setters, we offer an updated content library for the latest guidance, including the Sustainability Accounting Standards Board (SASB) and Task Force on Climate-Related Financial Disclosures (TCFD). Instantly unlock access to essential resources that put these standards at your fingertips for easy reference and additional context. With customizable dashboards to view your most important KPIs, ESG Disclosures enables you to identify trends that matter most to your organization.

## **Automate workflows and simplify processes**

Unite internal stakeholders and streamline collaboration with clear accountability, timely reminders, and due dates to finalize your annual ESG report. Effortlessly assign tasks to the appropriate individuals, provide additional guidance where necessary, and track task progress throughout the organization. As changes are made, ESG Disclosures tracks and identifies updates to show revision history.

## **Create audit-ready reporting and disclose with transparency**

Stakeholders are looking for ESG data that boosts enterprise value. To inspire confidence, ESG disclosures must be easily auditable, covering both qualitative and quantitative aspects. NAVEX ESG Disclosures delivers vital assessments that meet the demands of investors, regulators, and the public. Gain visibility through year-over-year comparisons while enjoying the peace of mind that comes with an audit trail and revision history.

## **Innovate your approach to ESG and GRC**

As ESG disclosures continue to become an integral part of a modern data-driven GRC program, NAVEX One, the industry's first governance, risk, and compliance information system (GRC-IS) enables you to build on all aspects of a modern GRC program. One that helps you manage the legal, business, sustainability, and employee spectrum of compliance.

NAVEX ESG Disclosures is designed to be a core component of your GRC strategy and can be used to help develop a holistic program that mitigates risk and creates value.
