

NAVEX One AI

Trusted Innovation. Transformative Impact.

Empower your GRC strategy with AI that enhances human judgement

Artificial intelligence is revolutionizing governance, risk and compliance (GRC). At NAVEX, we believe AI should strengthen human expertise, not replace it. NAVEX One AI transforms complexity into clarity, turning data into confident action.

Why NAVEX One AI?

- | | |
|---|---|
|  Built on NAVEX trusted standards
Secure, reliable and data-driven foundation |  Proactive risk detection
Anticipate and address risks before they escalate |
|  Expertise-enhancing, not replacing
Designed to support your judgment, not override it |  Global guidance, local relevance
Acts as a global expert to deliver timely, actionable insights |

Our approach to AI

AI CAPABILITIES LIBRARY

Embedded tools for transcription, translation, rewriting, summarization, document search, and more are seamlessly integrated across the platform.

Specialized AI assistants

Embedded tools for transcription, translation, rewriting, summarization, document search, and more are seamlessly integrated across the platform.

Ethical AI by design

NAVEX AI ensures your data remains private and is never used for model training.

AI in action

AI Governance: embedding ethics into AI use

NAVEX One AI helps organizations define and uphold ethical standards for artificial intelligence. Governance and ethical conduct tools support AI policy creation and robust codes of conduct, reducing legal and reputational risks while aligning with your values.

To promote responsible adoption, NAVEX offers an Ethical AI Training Course and customizable microlearning modules that educate employees on AI principles, risks and best practices. A curated GRC content library, featuring EU AI Act and NIST guidance, supports the development of governance frameworks and controls aligned with global standards.

AI compliance workflows: enhancing efficiency and accuracy

NAVEX One AI streamlines compliance workflows with intelligent automation. AI Whistleblowing Report Intake recommends the most relevant issue types based on the content of a reporter's submission. At the same time, AI Incident Case Management provides content suggestions for faster, more accurate resolutions.

The NAVEX One Compliance Assistant delivers real-time policy guidance to employees, reducing confusion and improving decision-making. Machine learning translations ensure global teams can accurately understand disclosures, incident emails and notifications – eliminating language barriers across communications.

AI risk management: accelerating insight and decision-making

NAVEX One AI enhances third-party risk screening through AI-powered monitoring, reducing false positives and expediting AML/KYC decisions. Machine learning translations enable fast, accurate interpretation of third-party data and communications, supporting clear and timely risk assessments across global operations.

Smarter GRC starts here

NAVEX One AI makes compliance simpler, smarter and more effective, empowering you to deliver stronger outcomes confidently.

- Gain clarity and speed with real-time, role-specific guidance
- Streamline compliance workflows through automation
- Strengthen resilience by identifying risks early
- Boost efficiency across compliance, HR, risk, and legal teams
