## Incident Management: Capture More Reports and Do More with Your Data

A high-functioning whistleblowing and incident management program is the cornerstone of confident risk management. There's no better source of unfiltered, on-the-ground information than the data captured through a healthy speak-up program.

Are you getting as much out of your system as you could? Our research shows organizations that track reports from all sources — not just web and telephone — receive nearly twice as many reports. Increased report volume is a hallmark of a robust speak-up culture, yet can create its own challenges. This makes having an efficient, intelligent solution for tracking, analyzing, and reporting on that data even more valuable. Enhance your incident management program to better harness the wealth of information crucial to compliance and risk management with exciting features from NAVEX.

### Benefits of upgrading

#### Streamline case documentation

AI-assisted rewriting ensures clarity, professionalism, and audit-readiness.

#### Mitigate translation costs

Instant machine translations reduce professional translation costs and accelerate case investigation workflows.

#### Expanded report intake

Use report forms to cast a wider net by capturing open-door reports and other sources that may currently be unrecorded.

#### Increased reach

Extend program value across departmental lines with advanced case management tools, HRIS integration, and reporting.

#### Improved data quality

Elevate report quality and consistency with automated workflows and custom tasks.

#### Visualize program performance

Advanced analytics, dashboards and built-in benchmarking deliver actionable insights.

#### Augmented data capture

Collect the information most critical to your organization with custom report fields.

#### Advanced search

Use advanced search features to uncover trends, connect cases, and get a clearer picture of your organizational health.

Function	Foundation includes	Professional adds
AI	Not available	Enhance workflows and optimize efficiency with NAVEX One AI features for content rewrites and instant machine translations
Report Intake	Secure telephony and standard web report intake options.	Customizable web intake and open-door report forms that allow for wider visibility into organizational risk.
Investigations	Single case template for all investigations.	Adaptive case management that enables a distinct investigation template for different issue types, departments or tiers.
Management	Simple tools such as automatic case assignment, watchlists and notifications.	In addition to the foundation-level management tools, advanced tools such as full-text search and the ability to link related cases.
Analytics and benchmarking	Standard reports, templated and ad hoc, with sharing capabilities.	Premium analytics provide drill-down capabilities to identify trends and benchmarking shows yearly updates of benchmark data compared with your hotline information.
